Stacy Swivel Load Binder

From the illustration it can be seen that there is a swivel just below each hook on the Stacy Swivel Load Binder. The reason swivels are necessary is that when the chain is thrown over the load, it frequently becomes twisted. The swivel accommodates this and prevents breaking. The breaking strain of all parts of the tool is guaranteed greater than the bending strain of the handle. The combination will break any ordinary log chain.

Made in two sizes, Regular, and Jumbo.

BLASTING ACCESSORIES

DU PONT

BLASTING MACHINES—Portable Electric Generators for firing explosives charges. Capacities: 1 to 150 electric blasting caps. Compact, efficient and reliable.

PORTABLE MAGAZINES (Storage) are made of light steel in various sizes.

BLASTING CAPS—Fulminating detonators for high explosives, and are themselves fired by safety fuse.

ELECTRIC BLASTING CAPS—Are detonators fired with electric current generated by a Blasting Machine. Made in two strengths, No. 6 and No. 8—and having wires of different lengths.

WATERPROOF ELECTRIC BLASTING CAPS—Specially waterproofed electric blasting caps for use under considerable heads of water.

DELAY ELECTRIC BLASTING CAPS—Made in two classes: First Delay, Second Delay. When the current is applied there is a delay or lag in the time required for the First Delay, and a larger delay for the Second Delay. Instantaneous or regular Electric Blasting Caps are used in the first round. First Delay in second round, and Second Delay in third round.

SAFETY FUSE

DELAY ELECTRIC IGNITERS for firing shots in rotation consist of a copper shell to which is attached a piece of fuse of uniform burning speed, to which a blasting cap may be crimped for firing high explosives. Within the shell and directly above and in contact with the inclosed end of the fuse, is a priming composition in which the fine platinum wire bridging the terminals of the two wire leads is imbedded. The insulated copper leads pass through the sulphur plug and filling as in the ordinary electric blasting caps.

ELECTRIC SQUIBS for firing blasting powder are similar in general appearance to Electric Blasting Cap, but have a heavy paper cap instead of a copper one. The charge does not detonate like that in electric blasting caps, but merely shoots out a small flame.

CAP CRIMPERS—A special tool for attaching blasting cap to safety fuse. Made in two styles.

LEADING WIRE—Fourteen-gauge insulated copper wire, both single and duplex.

CONNECTING WIRE—Twenty and twenty-one gauge insulated copper wire.

RHEOSTAT—An electric bridge adapted to testing blasting machines.

GALVANOMETER—A small electrical instrument for testing blasting circuits to detect breaks.

TAMPING BAGS—Heavy paper bags 8 to 18 inches long and from 1 to 2 inches in diameter.

THAWING KETTLES are all made with a watertight compartment for the explosives which is surrounded by the receptacle for the hot water.

CORDEAU BICKFORD—Detonating Fuse.

PHOTOGRAPHIC SQUIBS—For electrically firing photograph flash powders.

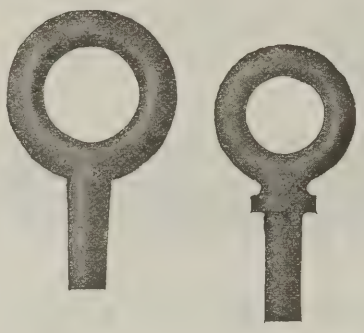
The McCabe Expansion Bolt

For fastening all kinds of Construction to Brick or Stone. It is simple and strong. The cut shows shell after being expanded. Note inclined ways. The shell is one piece and made of malleable iron, therefore it cannot be broken or lost in using. Any U. S. Standard bolt will fit our hexagon nut, consequently bolt can be changed without changing shell and nut.

Try it. Sample sent on application.



Write for catalogue of Parlor, Elevator, Accordion, Folding and other door hangers and ball bearing wheels.

CARY'S UNIVERSAL BOX STRAP

THE STRAP WITH THE "NAME"—THE KIND IT PAYS TO USE

This Strap is made of extra soft annealed steel of great tensile strength through which nails can be driven without first punching holes. The bosses stiffen the edge of the Strap and protect the nail heads when case is moved along the floor.

Made in four widths—½, ⅝, ¾ and ONE INCH.

Put up in coils of 300 feet each, and packed 20 coils in a case.

Every coil is equipped with our patent metal hanger, which makes it a complete reel that can be hung anywhere without floor space being occupied.

We manufacture a complete line of Metal and Wire Box Straps, Box Fasteners, Seals, Clasps, Corrugated Joint Fasteners, etc. Write for Our Catalog
